

deluxe blue onyx effect tiles

1200x600x10.5mm

Onyx is naturally formed between parallel bands of quartz, giving this stone the predictable soft, wavy lines that it's so sought after for. Our Deluxe Blue Onyx Tiles are designed in a smoky blue tone with contrasting hints of black and brown across the surface. They feature an impressively accurate onyx effect design with a shimmering gloss finish and rectified edges for a smooth and seamless look in your home.
